

Special Sale on Demo BioSpec-nano Micro-volume UV Spectrophotometers

# 50% Off List Price

## Shimadzu's BioSpec-nano Spectrophotometer Enables Fast, Easy Nucleic Acid Quantitation and Protein Analysis

Shimadzu's BioSpec-nano spectrophotometer features:

- Ultra-small Sample Volumes – Perform analysis with 1µL to 2µL samples
- Easy Operation with “Drop-and-Click” Analysis – simply drop the sample onto the target and click the button
- Automated Functionality – Sample mounting, measurement and cleaning are conducted by the instrument, eliminating the need for operators to perform tedious, repetitive, and inconsistent placement of the fiber optic element and manual cleaning required in other instruments
- Dedicated Software – Basic operations and output of data are performed quickly and simply with the click of a button

Combining automated functionality, an outstanding analysis range, and excellent measurement reproducibility makes the BioSpec-nano your solution for stress-free nucleic acid quantitation and protein analysis.

To order, use PN 206-26300-32.
